# Introduction

SCORE is a 2-day annual examination orientation and academic review program that is conducted for final year residents pursuing residency in cardiothoracic & thoracic surgical programs.

The program has been running on-demand for the past 12 years in an effort to provide a platform for residents to gain confidence in diagnostic and applied aspects of cardiothoracic surgery, both in theatre and at the bedside of patients.

Conceptualized and executed 'By the residents –For the residents' under the guidance of eminent teachers and experienced examiners, this Boot Camp is an effort for cardiothoracic surgeons-to-be to excel in various certification avenues.

# Why SCORE?

The residents attending the program will have a chance to go through their exam day, with the novelty of faculty teachers and examiners providing pointers through simulated environments, including the art of case taking, case presentation with discussion with detailed feedback.

In addition, delegates will have the opportunity to witness and take part in enriching real-time simulations involving assemblage of the cardiopulmonary bypass circuit, troubles during conduct of cardiopulmonary bypass, instrumentation and various other decision making scenarios, which every resident is expected to be familiar with and competent at.

The symposia also includes didactic and interactive lectures with the who's-who of cardiovascular surgical sciences, to address fundamentals, bolster concepts and fill any gaps, in addition to bringing a fresh lease of learning in an environment that has for over a decade redefined teaching in cardiovascular surgery.
